

## **FREQUENTLY ASKED QUESTIONS**

# **KABOOST™**

### **Will KABOOST fit under my chair?**

KABOOST fits under most chairs with 4 legs (round, square, or curved). It can be used with chairs with a diagonal distance between the legs of 50cm to 76cm. Do you have a chair with four legs? Then chances are KABOOST will fit for your chair!

### **Is KABOOST easy to attach?**

KABOOST can easily be placed under the chair in just a few seconds. Watch our demo video at [www.kaboost.be](http://www.kaboost.be)! Place KABOOST on the floor so that the arms form an X. Stand behind the chair and place the two back chair legs on two arms of KABOOST. Then pull out the other two arms of KABOOST and place them "ROUND" the front chair legs. Always make sure the chair is stable before using it.

### **Can adults use KABOOST?**

Yeah right! Adults use KABOOST too, and KABOOST can easily support up to 150kg! KABOOST is used by many seniors and other adults struggling with physical challenges such as arthritis, knee pain, joint pains or artificial hips. Or adults who just like to sit a little higher!

### **Will KABOOST stay firmly attached to my chair?**

KABOOST's rubber arms automatically clamp securely around the chair legs using a spring system. This ensures KABOOST stays securely in place and does not fall off your chair, even when the chair is moved.

### **How much does KABOOST raise the chair?**

KABOOST gives you the choice of raising your chair by either 9.5cm or 11.5cm, depending on which side of KABOOST you use. This makes it usable for a long time and grows with your child. Simply flip your KABOOST over to switch between the two heights.

### **Is my chair stable with KABOOST?**

KABOOST is specially designed to improve the stability of a chair. A chair with KABOOST is even more stable than without.

### **Is KABOOST safe to use and does it comply with all safety regulations?**

Yes. The safety of children and adults is an absolute top priority for KABOOST. KABOOST is designed to meet and even exceed all international safety requirements. KABOOST undergoes extensive testing at independent laboratories to ensure the finished products are sturdy, durable and safe. KABOOST is designed for children who do not need to be supported to sit on a chair and are able to climb on and off a chair by themselves. This encourages children's independence.

### **Can KABOOST be used on any type of floor?**

KABOOST can be used on all standard floors, including wood, parquet, concrete and tiles. Only use KABOOST on even surfaces.

### **In which colours is KABOOST available?**

KABOOST is available in two different colours: anthracite and natural.

### **What age can KABOOST be used for?**

KABOOST is recommended for children from 2 to 6 years old. Please read the manual to judge whether KABOOST is suitable for your child.

### **Can KABOOST carry my child even if my child is bigger/heavier for his age?**

KABOOST can easily carry up to 150kg.

### **What material is KABOOST made of?**

KABOOST is made of sturdy plastic.

### **Will KABOOST scratch my floor?**

KABOOST's rubber feet are non-slip and will not scratch the floor.

### **How portable is KABOOST?**

The KABOOST weighs only 1.6kg. It is compact, light and easy to fold. Ideal to take with you when visiting grandparents, family and friends or at restaurants. The dimensions are 30.5 x 33 cm (folded).

### **Can KABOOST be used with folding chairs?**

Thanks to the spring system, the KABOOST arms automatically grip the chair legs securely, so it can also be used with folding chairs.

### **Do you pass on my name and contact details to other companies?**

No, KABOOST does not pass on any information to other companies.

### **Encourage your child's self-confidence**

Children look up to their mother, father, siblings, and want to be like them. They reach an age where they no longer want to sit in a high chair "for babies". In fact, many children prefer to sit on their knees on the chair rather than in a high chair. With KABOOST, your child can sit on a normal chair like everyone else while still being at the right height at the table. So they feel part of the family. KABOOST helps your child to be independent and gain self-confidence.
